EDUCATION

The University of Texas at Austin BBA, Management Information Systems Major, Finance Minor, Computer Science Cert

TECHNOLOGIES

Computing Languages: Python, SQL (Postgres), JavaScript, TypeScript, Swift, Bash, PowerShell, R, C#, HTML, CSS

Frameworks: React, Express, Next.JS, ASP.NET, SwiftUI, UIKit

Tools and Libraries: Git, Github, Jira, Pinecone, GCP, Lucidchart, Figma, Rstudio, Xcode, NumPy, Pandas, Matplotlib, VS Code, VS, Excel, Claude Code, n8n, PyTorch, NotebookLM, ElevenLabs, LangChain, HuggingFace, Jupyter, Cursor, PowerBI, SSMS, Deno, Node.JS

EXPERIENCE

CGI – Public Sector Salesforce Consultant; Austin, Texas June 2026 – Current

- Facilitating cross-functional Salesforce modernization development for legacy software for 50+ Texas state government clients
- Creating and evaluating user stories, QA test cases, and UAT on Jira to ensure quality application deployment to 90,000+ users
- Managing Agile sprints for team of 50+ SWEs, Designers, and BAs to drive project progress and scope for enterprise-sized client

Gatherly – Co-Founder; Austin, Texas May 2026 – Current

- Co-founded a fintech Web App platform using Next.js and AWS to automate alumni donations for 5+ student organizations
- Leading engineering team of 5 SWEs and system design for DEV, SIT, UAT, and PROD for reliability, scalability, and availability
- Designed a scalable PostgreSQL database with Supabase and Prisma ORM, utilizing Mermaid ERDs for data modeling efficiency
- Architected micro-service REST and gRPC APIs (Stripe, Clerk, Twilio) delivering a secure, seamless user and payment experience

Google – Google Search Priority User Program; Remote April 2026 – August 2026

- Beta-tested 20+ experimental AI-driven search features, including intent-first search and Search Live for Gemini 3.5 Flash
- Advocated for human-centered design in emerging discovery tools, ensuring features were built with convenience in mind

National Science Foundation (NSF) – LDOS Research Data Analytics Lead; Austin, Texas August 2025 – May 2026

- Constructing Python data pipelines and dashboards (Matplotlib, Seaborn, Jupyter) to track \$12M NSF-funded research outputs
- Delivering research data visuals (Looker Studio) and brand marketing presentations, enhancing exposure for 70+ CS researchers

M & Sullivan Co., Ltd – Product Development Intern; Bangkok, Thailand February – May 2025

- Led product wireframe and deliverable timeline for 20+ SE Asian clients, reducing tax reporting cycles by an average of 3 days
- Built back-end OCR app features using NumPy and HuggingFace libraries, achieving 98% data accuracy on 10,000+ documents
- Pitched business plan and software's functionality to 20+ pre-seed investors, successfully raising 1M Baht for app development

PROJECTS

DCluter – CS329E iOS Camera-Roll Cleaning App Spring 2026

- Engineered app on Xcode using SwiftUI, enabling users to declutter their media libraries through swipe-based interface
- Deployed Firebase Authentication and Firestore to manage user registration, login states, and storage of user profile metadata
- Achieved high-performance using PhotoKit and GCD to fetch, group, and process PHAssets on threads while maintaining UI

Money Printer – FIN 372T Quant Research Platform Spring 2026

- Developed suite of built-in trading strategies; Momentum, Value, Mean Reversion, and Stat Arb to augment user thesis
- Implemented Claude API to contextualize user's natural-language investment theses into executable quantitative trading signals

Bevo's Bookstore – MIS 333K Full-Stack MVC Website Fall 2025

- Engineered C# ASP.NET MVC e-commerce site using MS Identity and SQL Server to manage role access for three user types
- Collaborated on application with 4-person team via GitHub; managed Azure server hosting and SQL Database cloud deployment
